ANNUAL SCIENTIFIC MEETING

The 1st Annual Meeting of AHAD-AP was held virtually in collaboration with the Indian Association for Haemophilia and Allied Disorders (IAHAD) on September 18 & 19, 2021.

The scientific program committee worked with colleagues from different countries in the region to put together a program which included recent global advances in the field as well as subjects of particular relevance to haemophilia practice in our region. Given the special need for enhanced diagnostic efforts and management of musculoskeletal complications of this disease, two special meeting tracks were included in the program to cover these subjects. The 2-day meeting on 18th and 19th September 2021, covered the following key topics - WFH Guideline for Haemophilia 2020, Experience sharing from the regional practice, VWD and many more. MSK Workshop and Laboratory Workshop were the highlights of the program.

The meeting received excellent feedback and a few suggestions from the participants, which will help in better planning of the next AHAD-AP meetings.
